PROFILE SUMMARY

A Telecommunication Engineering student at Telkom University with a growing interest in modern network infrastructure. I have hands-on experience from academic projects in implementing Software-Defined Networking (SDN) concepts using the Ryu Controller and exploring containerization with Docker. I am familiar with managing Linux-based virtual environments on Microsoft Azure and have developed basic network monitoring tools using Django. A dedicated learner who enjoys bridging theoretical knowledge with practical application, I am eager to contribute and grow within a collaborative environment.

EDUCATION

Telkom University – Bandung, Indonesia September 2024 - present

Bachelor of Telecommunication Engineering

- GPA: 3.65 /4.00 (57 Credits)
- Relevant courses: basic telecommunication engineering, Computer Networks (Switching & Routing), Programming Algorithms, AI & Machine Learning, and Software-Defined Networking.

MAS YAPENA – Aceh, Indonesia Juny 2021 – May 2024

Science Program

- Ranked 5th overall in academic achievement in the final school examination.

ORGANIZATION EXPERIENCE

GDGoC Telkom University Bandung – Bandung, Indonesia.
